Summary

Cloud and DevOps Engineer with an Engineering Diploma in Cloud Computing from ESPRIT and **FinOps Certified Engineer** certification from the FinOps Foundation. Hands-on experience in CI/CD, Docker, Kubernetes, OVHcloud production operations, observability, infrastructure security, automation, and GCP FinOps cost governance, achieving approximately 10% lower monthly costs in test environments. Experienced in troubleshooting, production support, infrastructure automation, and cloud cost optimization. Planning to further strengthen my FinOps expertise through the **FinOps Certified Practitioner** pathway. Continuously strengthening my expertise in FinOps, AI systems and models, infrastructure architectures, virtual machines, CI/CD pipelines, and observability, with a focus on interpreting metrics to support reliable and cost-efficient operations. Fluent in Arabic, with advanced English and French.

Technical Skills

Cloud & Platform	GCP, Azure, AWS, OVHcloud
FinOps / Cost	Billing & Budgets, Tagging Policy, Anomaly Detection, Cost Allocation by Namespace
Containers	Docker, Kubernetes, Helm
CI/CD	GitHub Actions, Jenkins
IaC & Automation	Terraform Modules, Python, Bash, Cloud Scheduler
Observability	Cloud Monitoring, Prometheus, Grafana
Web Stack	Angular, Spring Boot, React, Nginx, SSL/TLS

Experience

Université Italie

Cloud & DevOps Engineer CONTRACT

Bardo, Tunisia | On-site/Remote

Jan. 2025 – Present

- Architected and operated a production-grade Angular and Spring Boot platform; stabilized core business logic and cross-layer integrations to improve reliability and performance.
- Containerized frontend, backend, and database services with Docker Compose on an OVHcloud Linux VPS, enabling portable and reproducible deployments.
- Implemented GitHub Actions CI/CD for builds, tests, Docker image creation, deployment automation, environment-based configuration, and controlled production releases.
- Managed secure runtime operations including environment isolation, secrets management, health checks, database persistence, SSL/TLS, access controls, and Nginx reverse proxying.

Jobs Hunt

DevOps / Front-End Engineer FREELANCE, PART-TIME

Riyadh, Saudi Arabia | Remote

Aug. 2024 – Nov. 2024

- Delivered a multilingual EN/FR/AR web platform focused on responsive design, mobile optimization, performance, and multilingual content delivery.
- Built GitHub Actions CI/CD with staged Hostinger deployments over FTP/SSH, tag-based rollback, basic security scans, deployment runbooks, and technical knowledge transfer.

Target Energy Solutions

Lac II, Tunis, Tunisia

Cloud FinOps Engineer CONTRACT

Feb. 2024 – Jul. 2024

- Built a GCP FinOps framework for cloud cost visibility and governance using Billing Export, Cloud Monitoring signals, and GKE namespace-level workload metadata.
- Established tagging and label policies, namespace-based cost allocation, showback inputs, budgets, alerts, and anomaly-detection workflows using Z-Score and Isolation Forest.
- Applied Kubernetes resource requests and limits and Active Assist recommendations, achieving approximately 10% monthly cost reduction in test environments.
- Produced weekly usage-versus-billed reports, variance explanations, executive dashboards, operational runbooks, and reusable optimization practices.

DevOps Engineer INTERNSHIP

Jul. 2023 – Aug. 2023

- Deployed Kubernetes-based applications using reusable Helm charts and environment-specific configuration.
- Implemented dynamic variable injection and Go-template-based configuration to support multiple deployment environments.
- Built GitHub Actions workflows and webhook-based automation for application delivery.

- Applied a pull-based deployment approach to improve release control, consistency, and operational reliability.

Access Content Agency
Web Developer INTERNSHIP

Lac II, Tunis, Tunisia | On-site
Jul. 2022 – Aug. 2022

- Developed a React-based customer communication feature allowing website visitors to contact the company directly through WhatsApp.
- Designed a WhatsApp-inspired user interface aligned with the company’s existing website.
- Implemented responsive React components and improved access to customer-support and sales communication channels.

Ooredoo Tunisia
Web Developer INTERNSHIP

Lac II, Tunis, Tunisia | Hybrid
Feb. 2020 – Jul. 2020

- Contributed to an internal application for managing store deliveries, online orders, inventory visibility, and product availability.
- Developed features supporting delivery management and online-order processing.
- Implemented a product-availability feature that helped sales teams identify items in the nearest store.
- Contributed to improved logistics visibility, customer service, and operational efficiency using Angular and Spring technologies.

Selected Projects

Amoria AI Planner - AI / Mobile Project
Kotlin | Jetpack Compose | Firebase | Qwen3 | OpenStreetMap | MVVM

- Developed an Android application that generates personalized outing and activity recommendations using AI, user preferences, location data, and contextual information.
- Built **Default Mode** for individual recommendations and **Friends Mode** allowing groups of up to five users to join a shared room, complete preference-based quizzes, and receive common activity suggestions.
- Integrated **Firebase Authentication, Firestore, and Storage**, including Google Sign-In and shared real-time data.
- Integrated a locally served **Qwen3-4B-2507** model through LM Studio together with **OpenStreetMap and Overpass API** data to generate contextual and location-aware recommendations.

FixEat - Smart Maintenance Platform
Next.js | TypeScript | Supabase | PostgreSQL | Capacitor | Android

- Designed and developed a role-based maintenance management platform connecting companies and administrators through a centralized real-time workflow.
- Implemented **RBAC, authentication, client management, maintenance requests, image uploads, spare-parts tracking, reports, and real-time maintenance progress** using Supabase Auth, Realtime, Storage, and PostgreSQL.
- Built a structured multi-stage maintenance lifecycle allowing clients to submit equipment issues and follow each intervention from request creation through technician assignment, maintenance execution, completion, and final reporting.
- Converted the responsive **Next.js / TypeScript** application into an Android mobile application using **Capacitor and Android Studio**, maintaining a single application codebase.

Private Cloud Infrastructure - Academic Cloud Project
OpenStack | KVM | Linux | Networking | Virtualization

- Built a **private cloud from physical PCs** using **OpenStack and KVM**, configuring controller, compute, virtualization, and networking resources as shared infrastructure.
- Tested and benchmarked the environment until stable operation, then deployed and exposed a web application through the private cloud, validating the full path from **physical hardware to application delivery**.

Education

Engineering Diploma in Cloud Computing, ESPRIT — GPA: 18.32/20, approx. 91.6%, approx. 2021 – 2024
3.7/4.0, ECTS A

Bachelor’s in Computer Science, ISET Rades 2016 – 2020

Certifications & Languages

FinOps Engineer Certification	2026	English	Advanced
FinOps Foundation — Introduction	2025	French	Advanced
AWS Cloud Practitioner	2024	Arabic	Fluent
Microsoft Azure Fundamentals AZ-900	2023	Spanish	Beginner
